Note: Prior to movement, the driver of the OD/OW vehicle is responsible for confirming that the pilot car(s) conform to the pilot/flag car requirements as specified on the OD/OW permit. Further, the OD/OW driver is responsible for confirming that the driver of the pilot car vehicle, has a copy of the permit, and understands his/her role in this movement. Once movement has begun, OD/OW permit accuracy, including **overall dimensions and pilot car requirements**, are the sole duty and responsibility of the Carrier and the driver of the OD/OW vehicle. Confirming an order for pilot car services brokered by Route America, acknowledges and accepts the above duties and responsibilities. Once order is processed, an estimate will be sent to you for review and signature. Pilot cars will not be dispatched until signed estimate and agreement are returned to Route America, Inc.
